

Journey Without Return
Story cloth, 2010

"For many of my Latino brothers and sisters the journey to freedom may be a one-way trip. Throughout our lives we have heard about people's experiences of crossing over to this country, hoping to have a better future for their families. We have heard of the suffering they've experienced during that time and of the people that reach this border and never return to their families again. (Crossing) was very difficult for me because I had to run through the hills. I was very scared the whole time but I wanted my children to have what I had never had. I know that I was risking the lives of my children and my own, but finally, thanks to God and to the unknown people that crossed together with us, we are fine."
